1.1.2. Area of Rectangle 02:59

Write a Python program to calculate the area of a rectangle given its length and width.

Formula:

$$\text{Area of Rectangle} = \text{Length} \times \text{Width}$$

Input Format:

- First line contains a float value representing the length of the rectangle
- Second line contains a float value representing the width of the rectangle

Output Format:

- Print the area of the rectangle as a float value formatted to 2 decimal places.

Sample Test Cases +

areaOfRe... Submit

```
length = float(input())
width = float(input())
area = length * width
print(f"{area:.2f}")
```

Average time 0.005 s 4.70 ms

Maximum time 0.014 s 14.00 ms

5 out of 5 shown test case(s) passed

5 out of 5 hidden test case(s) passed

Test case 1 14 ms Debug

Expected output	Actual output
10.5	10.5
5.2	5.2
54.60	54.60

Test case 2 4 ms

Terminal Test cases

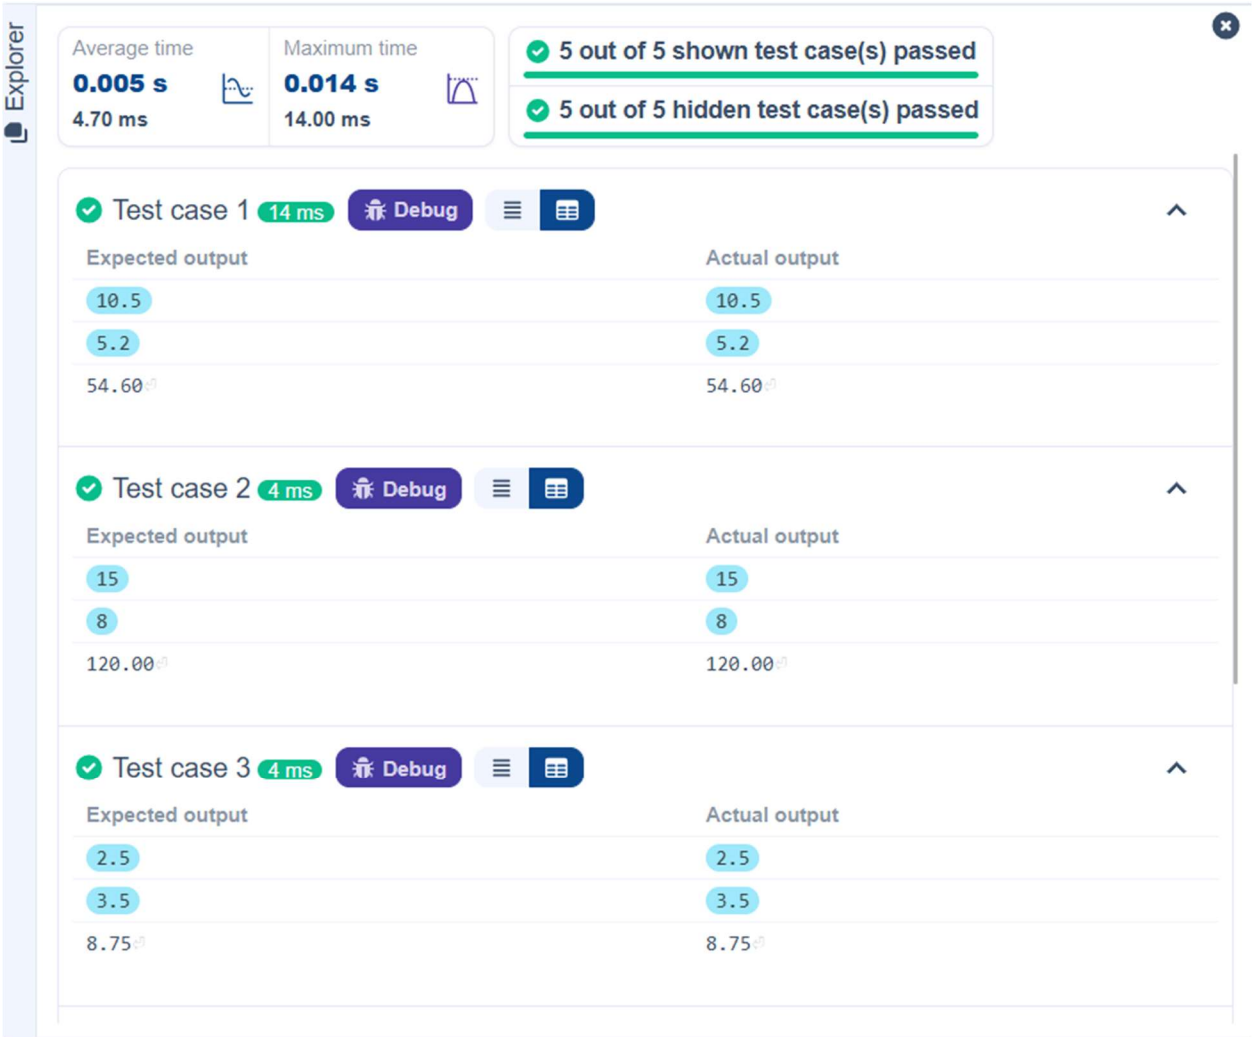
Prev Reset Submit Next

Test case 4 3 ms Debug

Expected output	Actual output
100	100
50	50
5000.00	5000.00

Test case 5 3 ms Debug

Expected output	Actual output
7	7
7	7
49.00	49.00



1.1.3 Area of Square

ALGORITHM:

Step 1: Start

Step 2: Input side

Step 3: Calculate the Area of Rectangle

Area = side * side

Step 4: Display Area

Step 5: Stop

1.1.5 Student Pass or Fail

ALGORITHM:

Step1: Start

Step 2: Read the marks obtained by the student

Step 3: Check if marks ≥ 40

- **If yes, print "Pass"**
- **If no, print "Fail"**

Step 4: Stop
